PURPLE FOLIAGE DATA – Year of data:_____ Year submitted: _____

Cultivar	Submitter	Postal or Zip Code	Purple at base of foliage up to 3 in/7 cm?			Purple elsewhere on leaves or stem other than at base?			Purple around spathe?			Wire edging?	Purple on rhizome?	NOTES
			Pre-bloom	Bloom	Post-bloom	Pre-bloom	Bloom	Post-bloom	Pre-bloom	Bloom	Post-bloom			
Ex: Lucky Doris	**DWP**	**17347**	**Light**	**Y**	**Y**	**Deep**	**Y**	**Y**	**Y**					

DEFINITIONS

- **Cultivar** – a named, registered iris. PLEASE make sure cultivars are correctly identified.
- **Submitter** – your initials, three if you have them. If people have the same initials, we'll add a number after each, as in DWP1, DWP2, etc., in the order they're received.
- **Postal or Zip Code** – Postal Code if you're Canadian, Zip Code in the US; all others, just use the country you live in.
- **Pre-bloom** – about a month prior to normal bloom time in your area
- **Post-bloom** – about a month after bloom time
- **Purple at base of foliage up to 3 in/ 7 cm?** – classic pbf. If it seems especially deeply colored to you, put **deep** here; if especially **pale**, put that; otherwise just **Y** for yes & **N** for no. It's just as important for us to know which irises DO NOT have pbf as it is to know those that do, so please do include them.
- **Purple elsewhere on leaves or stem other than at base?** – This is in addition to or instead of classic pbf. Note the next three columns, though.
- **Purple around spathe?** – The spathe is the papery or fleshy covering over the bud. Do not include color of the bud itself, just the covering.
- **Wire edging?** – Sometimes leaves have a thin, wiry edging of purple at the base or higher up.
- **Purple on rhizome?** – This is for any purple below the foliage base, rhizome and/or roots.

Note to those unfamiliar with Word tables: Place cursor in last cell [lower right] and press "tab" to add a new row.
